CAREER OBJECTIVE

Full stack developer with hands-on project experience and ability to perform well in a team. Outstanding individual with a proper balance of both technical and communication skills seeking to leverage my development skills to provide excellent full stack solutions. Deep passion to always learn something and try out of the box things.

PROJECTS

Portfolio – Next.js (https://www.armaancodes.com/)

- Developed a dynamic portfolio website using Next.js framework, incorporating features such as dynamic routing, Tailwind CSS, and Framer Motion libraries to enhance user interface.
- Implemented dynamic routing to provide seamless navigation for users and utilized Tailwind CSS to ensure consistent design throughout the site.
- Leveraged Framer Motion libraries to create engaging animations and deliver an immersive user experience on the portfolio website.

WeDD (We Designated Drivers) – React.js, Node.js, MySQL

- Lead and developed a taxi booking service for we-dd.ca as the deliverable for capstone academic project.
- Implemented 3 role approach – customer portal, driver portal, admin portal.
- Exposure- Object oriented programming, Leaflet maps API, Functional programming.

Inventory Manager – React.js, Node.js, MySQL

- Developed an inventory manager for storing the inventory items.
- Provided functionality of authorization adding, removing or updating items using CRUD operations using RESTful APIs.
- Generates a detailed report for the user's inventory.

Connect - PHP, JavaScript, MySQL

- Developed and designed a real time chat application based on PHP.
- Uses JavaScript XHR (XMLHttpRequest) REST-API for updating chat area based on user's chat from the database.

TECHNICAL SKILLS
